VPN Before Login for Windows 10

This process is used for House Imaged Workstations Only

Step 1: Establishing an Internet Connection
For Wi-Fi Connections, click on network icon below and sign into your locations Wi-Fi. If this will be a common location, please select "Connect Automatically" so you can skip this process for this location in the future.

For Wired Connections, unless the icon has a Red X or Yellow Triangle, please skip to next step.

If there is a Red X or Yellow triangle, please verify ethernet cable is securely connected. Please contact your IT Vendor or Local Site Support team for further troubleshooting.

Step 2: Connection to House VPN
Click on the "Double" Network icon below which is the Cisco Any Connect App.
Step 3: Connection to House VPN
1. In the VPN app, type in (if not already there) sodium.house.gov, then select Connect.
2. On the next popup, type in your House User ID. (Ex J Smith for John Smith etc.)
3. Then type in your "Passcode".
   a. This will be either the 8 Digit Code using the RSASecurID App on your House Issued Mobile Device
   b. Or your Hard Token's Pin + 6 Digit code
4. If code has been entered successfully, please click "Accept" to the House Disclaimer" .
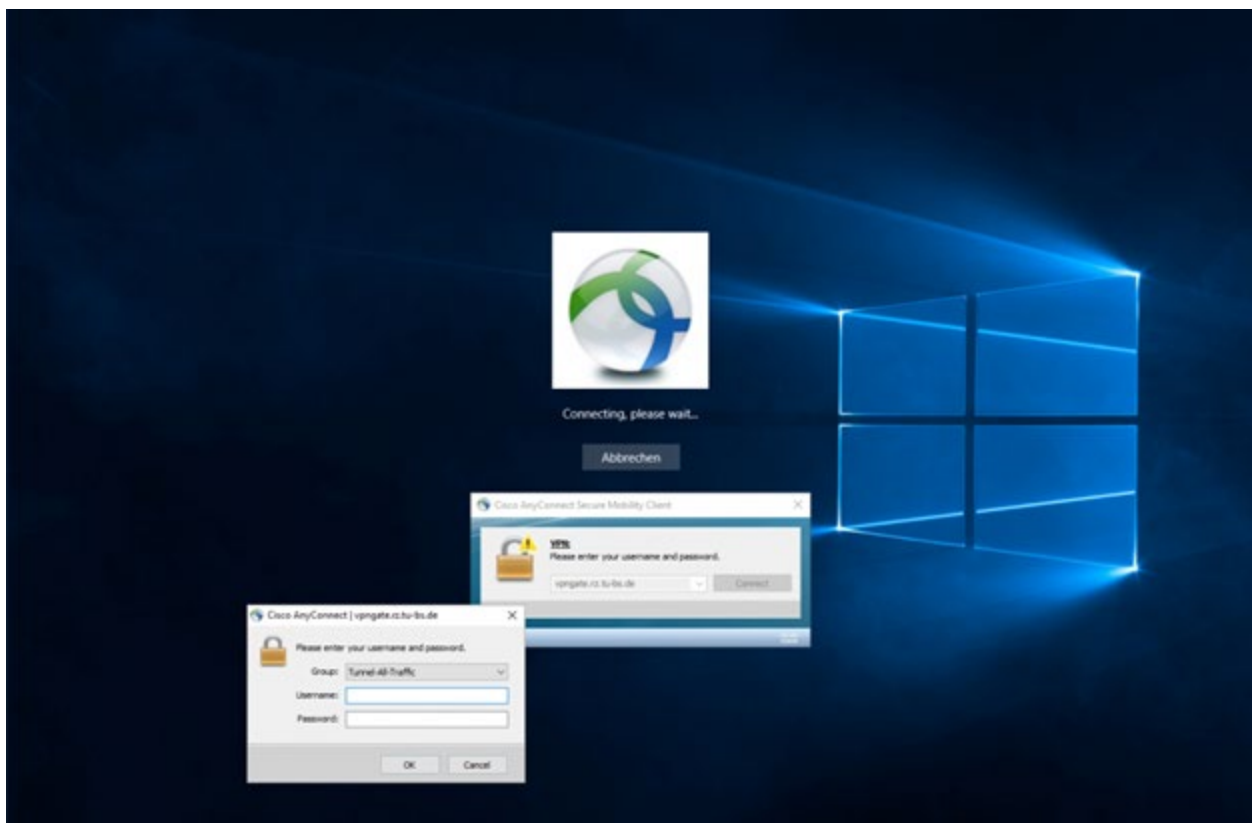

Step 4: Logging In.

Lastly, Click on "Other User" and enter your standard House User ID and Standard House "Password" (not passcode).
