

How to Find L2 Universes in IQ

Any list you save under “Universes” on the right side of the screen in ConstituentMapping will automatically show up in IQ under Contacts big menu → Constituent Mapping Universes.

Here you'll see a list of all universes you've created. Simply click on import universe directly above the name of the universe.

The screenshot shows the 'Contacts » Results' page for 'Constituent Mapping Universes' with 17 results. The interface includes a navigation bar with 'Home', 'Contacts', 'Messages', 'Outreach', 'TourTrackr', 'Services', 'Library', 'Events', 'LegiStats', and 'Admin'. A left sidebar contains 'Filters' with a search box and 'Create Date', 'Count' options. The main content area displays a table of universes with columns for name, count, and created date. The 'Support Go' row is highlighted, and its 'Import Universe' button is circled in red. A tooltip for this button reads 'Import Contacts from a Constituent Mapping Universe'.
