

VPAT Information

The purpose of the Voluntary Product Accessibility Template (VPAT) is to assist Federal contracting officials in making assessments regarding the availability of commercial Electronic and Information Technology products and services with features that support accessibility.

Date: August 2016

Name of Product: Intranet Quorum v3.8

Contact for more Information: Michele Cooke, michele.cooke@leidos.com

Criteria	Supporting Features	Remarks and explanations
Section 1194.21 - Software Applications and Operating Systems	Not Applicable	
Section 1194.22 - Web-based Internet information and applications	Included	
Section 1194.23 - Telecommunications Products	Not Applicable	
Section 1194.24 - Video and Multimedia Products	Not Applicable	
Section 1194.25 - Self-Contained, Closed Products	Not Applicable	
Section 1194.26 - Desktop and Portable Computers	Not Applicable	
Section 1194.31 - Functional Support Criteria	Not Applicable	
Section 1194.41 - Information, Documentation and Support	Not Applicable	

Section 1194.22 Web-based Internet information and applications Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported	All images and objects within IQ3 have text that is equivalent to the images/objects meaning.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supported	IQ3 eLearning provides synchronized voice and visual presentation options.

(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	IQ3 does not utilize server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Supported	
(g) Row and column headers shall be identified for data tables.	Supported	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supported	
(i) Frames shall be titled with text that facilitates frame identification and navigation	Supported	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Supported	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supported	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Supported	
(n) When electronic forms are designed to be completed online, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supported	The Alt + K keystroke combination is provided to skip to main content. However, IQ3 utilizes a more “standard” approach to skip

		<p>navigation by placing a "Skip Menu" link at the top left of each Explorer and Record page. The following steps define the IQ Skip Menu strategy:</p> <ol style="list-style-type: none"> 1. When "outside" of forms mode and not in a form already, press the key combination Ctrl + Home to get to the top of the page (IE Title bar). 2. Once at the IE Title Bar, a press of the Tab key will move the cursor to the Skip Menu link. 3. Once at the Skip Menu link, a press of the Enter key will place focus on the Alt K "main content" link. 4. Once at the Alt K "main content" link, press the tab key to arrive to the main content. <p>Note: Focus should be on Main Content when coming into any explorer, record, or dialog page. This is by IQ3 application default.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Supported</p>
